

# HIGH PRECISION ACCESSORIES FOR MODERN MECHANICAL WORKSHOPS

NIC is your trusted partner for the supply of high precision accessories enhancing the performance of your CNC machine tools; our products are divided in three different categories :

**TOOLING;** NIC offers modular systems for high precision boring operations; our Mr. Nicola D'Andrea is the son of Marino D'Andrea, the brilliant inventor of boring heads. We also have multi-purpose tools for machining centers and CNC lathes, suitable for centering, countersinking, deburring, rounding, turning and facing.

**ACCESSORIES;** Our range of products includes portable sharpeners, precision vises for machining centers, high precision vises and accessories, edge finders, feeler pins, zero adjusters and live centers.

**LIGHTING;** We can supply halogen fluorescent and LED lamps both for machine tools and workbenches, in accordance with EC specifications, available with different types of voltage and IP protections.

Feel free to contact us for more info:
