

HOME-MADE RAVIOLI...?!?

Look at these **NEW** shapes for

**HOME-MADE DOUBLE SHEET
RAVIOLI !!!**

Square shapes from mm. 22 to mm. 70 (from 1 to 3")
really looking as hand-made by a housewife !!!

Available for any brand and model
of double sheet ravioli machine !!!

The extra sealing sidewall ASSURES the ravioli perfect sealing, even with greasy fillings. It is a **home-made ravioli**, but its sealing guarantee is "industrial level"!

The filling pocket bottom is intentionally rough for adding an extra "country" characterization to your product.

Our skill engravers make by hand the cut of these "fork thrusts". Each die is **unique**, you won't find a die identical with another one!

Gravity ejectors make sure to have ravioli not sticking to the cutter. **ALWAYS!**

Ravioli cut is made by a single roller; it allows to adjust pasta thickness as you desire. How can you still work with those old dies with brittle brass rings on the former roller ?

Dies are available for **ALL (BUT REALLY ALL...)** brands of double sheet ravioli machines. Feel free to call for more info !!!
